Who We Are

Rothers Strategy is the sought-after advisor for aerospace and aerospace-related industries and their respective technologies. Rothers Strategy increases companies' competitive advantages by exploiting opportunities, applying creativity, and sharing knowledge. Rothers Strategy provides clarity to a complex and constantly changing market.

What We Do

Rothers Strategy provides business development services, as it relates to technology innovation, procurement, and marketing, in order to foster new growth in newly established companies or reinvigorate growth in existing firms within the aerospace industries worldwide. Rothers Strategy's specific services include:

- R&D Advisement and Technology Assessments
- Competition Analysis
- Commercial Exploitation
- New Market Entry Consulting
- Innovation Strategic Advisement

ROTHERS

TECHNOLOGY

Who We Are

Rothers Technology provides the right products at the right price and right on time. Rothers Technology is the leading aerospace equipment brokerage and acquisition advisory firm within the aerospace and aerospace-related industries worldwide. Rothers Technology provides unmatched technology procurement services for clients at an international level.

What We Do

Whether a company produces an aircraft or just the steel utilised on an aircraft, all companies have equipment and material requirements—both on a system and component level. With these equipment and material needs come costs. Rothers Technology, helps reduce those costs by identifying, evaluating, and brokering with the lowest cost providers on a global scale. Specific services include:

- Technology Brokering
- Technology Scouting and Sourcing
- Technology Procurement
- Technology Transfer
